Northwest Institute for Cybersecurity Education and Research

Upcoming competition opportunity

Chapter 2: Sentinel's Watch

- Register for Chapter 2 in the VICEROY Cyber Competition Series. Think like an adversary and test a system's resiliency to cyber attacks. Map endpoints, slip past wireless defenses, exploit vulnerabilities, and pivot through hosts.
- January 27-29, 2026
- Competition is virtual

Apply By January 19, 2026

- **VICEROY competitions homepage:** viceroyscholars.org/competitions
- **Smartsheet application form:** https://ow.ly/ZfIF50Xx5AI

Opportunity To Learn

- Linux and Bash fundamentals
- Python scripting
- Packet captures
- Cryptography concepts
- Web exploitation
- Wireless cracking
- CVE analysis

Share Your Highlights

- All participants are expected to uphold the integrity of the skills competition by maintaining confidentiality regarding its content, structure, and experience. Scholars agree not to share or discuss any details of the competition with individuals or teams who have not yet participated.
- **Provide photos or videos to:** https://tinyurl.com/557ntv23
